

BANA 273 Session 1

## Assignment Project Exam Help

Data Mining Intelligence <https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

Prof. Vibhanshu ( ishek

The Paul Merage School of Business

University of California, Irvine

# Agenda

- Introduction
    - Instructor and TA
  - Course Logi
  - Data Mining
  - SQL
- Assignment Project Exam Help
- <https://eduassistpro.github.io/>
- Add WeChat edu\_assist\_pro

# About the Instructor

- Undergraduate degree in Computer Sc & Engr
  - Indian Institute of Technology, Kanpur
- Masters in Statistics
  - University of Pennsylvania Wharton School
- Ph.D in Operations Management
  - University of Pennsylvania Wharton School
- Assistant Professor at Carnegie Mellon University
- Just joined UCI 😊

# Teaching

- 273 Business Intelligence for Analytical Decision Making – RANA/FEMBA Assignment Project Exam Help
- 173 Business Intelligence for Analytical Decision Making – U <https://eduassistpro.github.io/>
- Digital Marketing Analytics Add WeChat edu\_assist\_pro
- Managing Disruptive Technologies

# Research

- Effect of emerging technologies on consumers, firms and markets

Assignment Project Exam Help

- Digital Market

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

# Some Consulting Projects

- Sequoia Capital
- Adobe
- McKinsey
- LEGO
- Kaplan
- One Championship
- Rivigo

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

# BSA Survey on Analytics

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

## Other than work ...

- Startups
- Photography

Assignment Project Exam Help

- Travel
- Anvi

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

# Course Topics

- Getting data from Database: Structured Query Language
- RFM Analysis, Excel Pivot Tables
- Basic Probability & Information Theory
- Preparing Data
- Data Mining Methods
  - Classification Using Naïve Bayes
  - Classification using Decision Trees
  - Association Rule Mining
  - Clustering

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

# Who should take this class

- Required core class for MSBA students
- No prior technical knowledge is assumed
- Aptitude for learning technical concepts
  - Algorithms <https://eduassistpro.github.io/>
  - Software (MS Excel, Weka)
  - Understand business concepts
- Course is recommended for students interested in understanding the techniques and applications of data mining and acquiring hands-on skills for making intelligent business decisions in data-rich organizations.

# Guidelines for this course

- No cell phone or laptop usage in-class unless required for class
- UCI Office
  - Post class
  - Do not share individual ass
- Learn about US businesses, language and culture
- Groups for class project

Assignment Project Exam Help

  - Easy access to performance
  - Ability to drill down into the data
- Data Mining

Assignment Project Exam Help

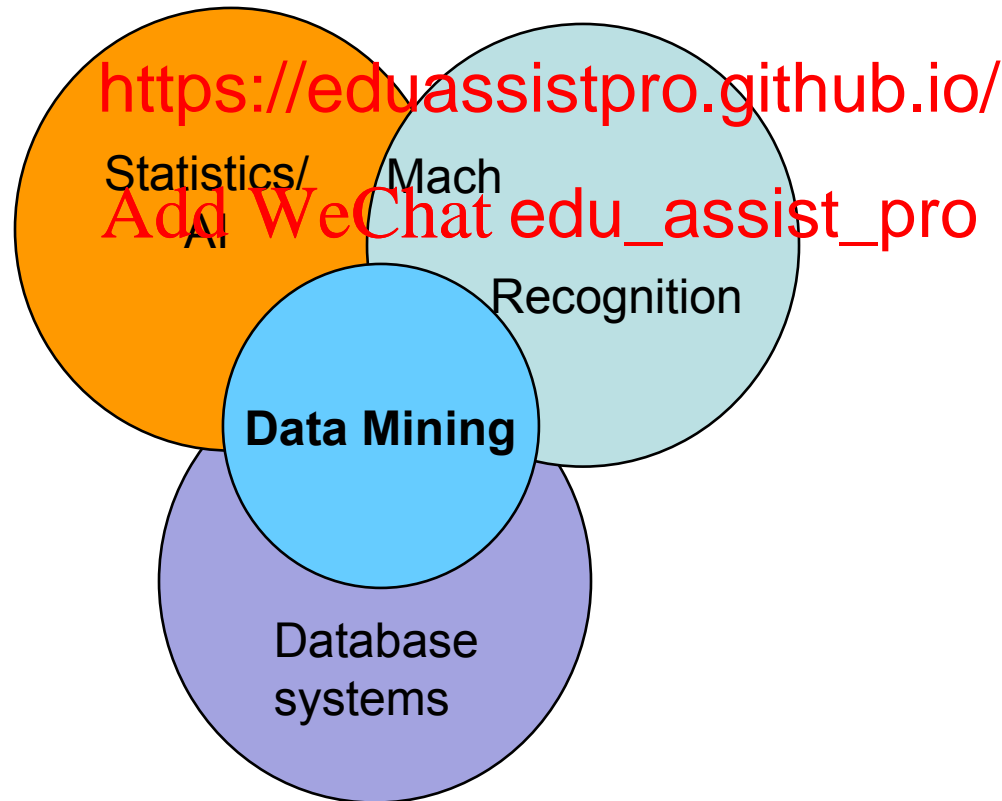

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

# What Is Data Mining?

*Data mining is a **process** of discovering and interpreting (unknown) patterns in data to solve a business problem.*

Assignment Project Exam Help

# Data Sources for Data Mining

- Public and private data
  - Demographic data
  - Customer data
  - Transaction data
  - Product data
- Accounting and marketing
  - Web logs (click-stream data)
  - Application server-logs
  - Third party server-logs
- Data integration is an important challenge

Add WeChat edu\_assist\_pro

# Classification: Definition

- Given a collection of records (*training set*)
  - Each record contains a set of attributes, one of the attributes is the *class*.
- Find a *model* <https://eduassistpro.github.io/> is a function of the values of other attributes
- Goal: previously unseen [Add WeChat edu\\_assist\\_pro](#) could be assigned a class as accurately as possible.

# Classification Example

categorical  
categorical  
continuous  
class

Tid	Refund	Marital Status	Taxable Income	Cheat
1	Yes	Single	123K	No
2	No	Married	100K	No
3	No	Single	70K	No
4	Yes	Married	120K	No
5	No	Divorced	95K	Yes
6	No	Married	60K	No
7	Yes	Divorced	220K	No
8	No	Single	85K	Yes
9	No	Married	75K	No
10	No	Single	90K	Yes

Refund	Marital Status	Taxable Income	Cheat
No	Single	175K	No
No	Single	100K	?
Yes	Single	100K	?
No	Single	100K	?
No	Married	80K	?

<https://eduassistpro.github.io/>

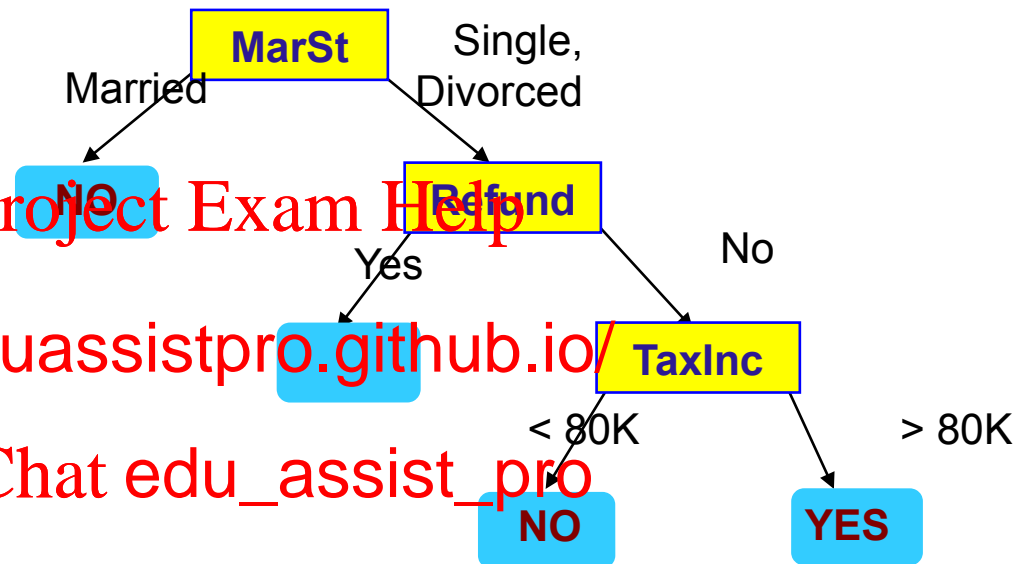

Add WeChat edu\_assist\_pro

# Example of Decision Tree

categorical  
categorical  
continuous  
class

Tid	Refund	Marital Status	Taxable Income	Cheat
1	Yes	Single	125K	No
2	No	Married	100K	No
3	No	Single	70K	No
4	Yes	Married	120K	No
5	No	Divorced	95K	Yes
6	No	Married	60K	No
7	Yes	Divorced	220K	No
8	No	Single	85K	Yes
9	No	Married	75K	No
10	No	Single	90K	Yes

(11, Yes, Divorced, 115K)

(12, No, Single, 150K)

# The SELECT Statement

- Used for queries on single or multiple tables

## Clauses of the SELECT statement:

- SELECT - List the columns (and expressions) that should be returned from the query
- FROM - Indicate the table(s) or view(s) from which data will be obtained
- WHERE - Indicate the row(s) that will be included in the result

## Optional clauses:

- GROUP BY - Indicate categorization
- HAVING - Indicate the conditions under which a category (group) will be included
- ORDER BY - Sorts the result according to specified criteria

## SQL Query

Printer Table

printermodel	color	type	price
3004	FALSE	laser	879
3005	FALSE	ink jet	180
3006	TRUE	dry	470

Assignment Project Exam Help

- SELECT <attribute> FROM printer;
- SELECT printermodel, color FROM printer WHERE price<300;

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

# Aggregation Operators

- SUM
  - SELECT SUM(price) FROM PC;
- AVG
  - SELECT AVG(price) FROM PC WHERE speed>800;
- MIN
  - SELECT MIN(price) FROM PC;
- MAX
  - SELECT MAX(price) FROM PC WHERE speed>800;
- COUNT
  - SELECT COUNT(model) FROM PC;
- Keyword DISTINCT (not an aggregation operator)
  - SELECT DISTINCT type FROM printer;

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

# Practice

PRODUCT(maker, <u>model</u> , type)
PC( <u>PCmodel</u> , speed, ram, hd, cd, price)
LAPTOP( <u>Laptopmodel</u> , speed, ram, hd, screen, price)
PRINTER( <u>Printermodel</u> , color, type, price)

Assignment Project Exam Help

<https://eduassistpro.github.io/>

- List the model and speed of P ice<2000.
- How many laptops are there with screen size>11.
- What is average price of laptops with ram=20.
- List all attributes of all color printers

Add WeChat edu\_assist\_pro

# Practice

Book(ISBN, Title, Publisher ID, Author, Cost, price)

Publisher(Publisher ID, Name, Location)

1. List the publishers and their location.
2. List all book titles
3. How many books e book has one entry in the book table)
4. What is the total cost of the books?
5. List all distinct book titles
6. What is the expected profit per book for books published by Publisher ID 222?

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

Print the speed and price of PCs that cost less than \$2000

A: Select speed, price from printer where price < 2000

B: Select speed, price from laptop where price < 2000

C: Select speed, price from all PCs where price < 2000

D: Select speed, price from all PCs where price < 2000

E: None of the above

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu\_assist\_pro

Print the price of the cheapest laptop

A: Select price from printer

B: Select min(price) from pc

C: Select min(<https://eduassistpro.github.io/>)

D: Select chea

E: None of the above

# Online help for learning SQL

## Joins - Queries From Multiple Tables

- Some queries require combining information from two or more tables.
- Example: I want the Model #, Manufacturer and Speed of all PCs. 'maker' is in the 'product' table, but 'speed' is in the 'pc' table.

- Example: <https://eduassistpro.github.io/>

SELECT product.model,  
product.maker, pc  
FROM product, pc  
WHERE product.model=pc.pcmode;

# Cartesian Product

- This helps to understand what a query from two tables does. **Assignment Project Exam Help**
- Set theory concept: Cartesian product of 2 sets: R and S is a set of ordered pairs (r, s) where r is an element from R and s is an element from S. **<https://eduassistpro.github.io/>**  
**Add WeChat edu\_assist\_pro**
- Example:  $R=\{a,b,c\}$ ,  $S=\{b,e\}$ 
  - $R \times S = \{ a.b, a.e, b.b, b.e, c.b, c.e \}$

# Cartesian Product Example

UCI\_Students

SSN	L Name	F Name
000-00-0001	Doe	John
000-00-0002	Doe	Jason
000-00-0003	Smit	

Football\_Players

SSN	Team
000-00-0001	Chargers
111-11-1112	AntEaters
03	49ers

<https://eduassistpro.github.io/>

Add WeChat [edu\\_assist\\_pro](#)

- SELECT \* FROM UCI\_Students, Football\_Players;
- SELECT UCI\_Students.SSN, Football\_players.SSN  
FROM UCI\_Students, Football\_Players;
- How can we get names of UCI students who also play football?

PRODUCT(maker, <u>model</u> , type)
PC( <u>PCmodel</u> , speed, ram, hd, cd, price)
LAPTOP( <u>Laptopmodel</u> , speed, ram, hd, screen, price)
PRINTER( <u>Printermodel</u> , color, type, price)

### Assignment Project Exam Help

- List the model #, price of laptops made by maker 'C'.

<https://eduassistpro.github.io/>

- List the model, type and price of printer from maker 'G'

- List model, speed and price for PCs and Laptops that have the same price. (Do not JOIN on *model*)

# Practice

Book(ISBN, Title, Publisher ID, Author, Cost, price)

Publisher(Publisher ID, Name, Location)

1. List all books by the publisher with name 'Wiley and Sons'
2. List all book titles a
3. List the ISBN and title of the book is the same as the location of the publisher.

Assignment Project Exam Help
